Good cakes taste better shared

Wedding Cakes

Designed to be as memorable as your special day.

Standard Height Tiers

CLASSIC LOOK,
TIMELESS STYLE

4 inch
- 6 people

7"
- 16 people

10 inch
- 30 people

4 inch
- 6 people

7"
- 16 people

10 inch
- 30 people

Same sizes,
same servings —
different height,
different weight.

Standard tiers and taller
tiers can serve the same
number of people —
but their weight can differ.

Taller tiers are usually heavier
because they contain more
sponge, filling, and decoration.

Size and weight guide are for reference only. Depending on style, composition, and design, final weight may vary.

CAKES FOR LIFE'S SWEETER MOMENTS

More
than a cake...
a beautiful
part of your
story. 

Wedding Cakes

Designed to be as memorable as your special day. 

Why wedding cakes cost more

Wedding cake prices are not higher simply because it is a wedding.

They cost more because they involve more work in the design, stacking, structure, and finishing.

A tiered wedding cake usually includes 2, 3, or more actual cakes, plus larger and stronger boxes, multiple cake boards, dowels, and extra setup work.

The flavour and composition can be almost any of the cakes from my menu.

Even dummy cakes take time to decorate and finish beautifully.

Dummy cakes

- If you would love a bigger cake with more tiers but do not have many guests, dummy (fake) layers can be used.
- Another option is a full dummy display cake with a matching sheet cake served to guests.

*Bigger dreams
are always possible*

Important to know

- All cakes must be kept refrigerated unless they are fully dummy cakes.
- Wedding cakes can also be 1 tier, and they can be just as beautiful as bigger cakes. It's not about the size, but the design, details, and the love put into it that makes them special.
